DEFINITIONS:

Subject Area and Catalogue Number

A 4-letter subject area code plus a 4-digit catalogue number make up the course code, e.g. **BIOL 1033**. You can search for courses by using this code.

Class Number

A class number is a unique number used to identify individual classes held during a specified study period. You can use class numbers to enrol, starting with the class number of the enrolment class

Enrolment Class

An Enrolment Class is the first class you enrol in for a particular course. This can be a lecture (LEC), tutorial (TUT), workshop (WSH), practical (PRA) or external (EXT) to name a few examples. There may be multiple enrolment classes to choose between. All other components will be related to the enrolment class and will display once you select your enrolment class.

Related Classes

Related classes are other components (i.e. a tutorial or practical) that make up the course. In some cases you may be automatically enrolled into a particular related class that is associated with the enrolment class you selected.

Auto Enrol Class

In some courses, once you select the Enrolment Class, you are automatically enrolled (Auto-Enrol) in a second (related) class (e.g. by choosing a tutorial you are automatically enrolled into the lecture). The class number will be listed in the Auto-Enrol column below. You may still be required to select another related class to complete your enrolment.

The table below shows the full list of courses to be taken by a student undertaking a full-time load in Study Period 6
