

6th Annual Symposium

At the Frontiers of Neuroscience: Signs & Symptoms

Pullman Hotel, Hindmarsh Square, Adelaide
Tuesday 23 October 2018

FREE registration (email: symposium@bionomics.com.au)

Time	Speaker	Topic
9.30	TEA AND COFFEE	
	SESSION 1:	
10.00	Dr Deborah Rathjen CEO & Managing Director, Bionomics	Welcome
10.15	Dr Darryle Schoepp Vice President, Neuroscience Discovery, Preclinical, and Early Development, Merck Sharp & Dohme	Navigating the Crossroads of Neuroscience Drug Discovery
10.45	Professor Paul Fitzgerald Professor of Psychiatry at Epworth Healthcare, Monash University	The Use of Non-invasive Brain Stimulation in the Treatment of Mood and Cognitive Disorders
11.15	Professor Murray B. Stein Distinguished Professor of Psychiatry and Family Medicine & Public Health & Vice Chair for Clinical Research in Psychiatry, University of California San Diego	Pharmacotherapy of PTSD: What We Know and What We Need
11.45	LUNCH	
	SESSION 2:	
12.30	Dr Sophie Parmentier-Batteur Director - Neurodegenerative Diseases Discovery WP, Merck Sharp & Dohme	A Tau-Centric View of Alzheimer Disease Suggests Multifaceted Therapeutic Targets
1.00	Professor Linda Richards Deputy Director, Queensland Brain Institute	Australia's Current and Future Neuroscience Research Capabilities that are Driving Engagement in the Global Effort to Understand the Brain and To Treat Neurological Diseases and Mental Illnesses
1.30	Dr Fiona Thomson Director of Translational Pharmacology Laboratory, Institute of Cancer Sciences, University of Glasgow, UK	Translational Biomarkers in Drug Development for CNS Disorders
2.00	Professor Marina Picciotto Charles B.G. Murphy Professor in Psychiatry & Deputy Chair for Basic Research, Yale University	Nicotinic Acetylcholine Receptors and their Role in Stress-induced Behaviours
2.30	AFTERNOON TEA	
	SESSION 3:	
3.00	Associate Professor Gideon Caplan Director of Post-Acute Care Services and Director of Geriatric Medicine at Prince of Wales Hospital	Discovering Delirium
3.30	Dr Marguerite Evans-Galea Bruce Lefroy Centre for Genetic Health Research, Murdoch Children's Research Institute, The Royal Children's Hospital	Freidrich's Ataxia - An Overview of Cell and Gene Therapy Strategies and Drug Development
4.00	Dr Richard Hargreaves Corporate Vice President Neuroscience & Imaging, Celgene	Restoring Protein Homeostasis and Reducing Neuroinflammation to Alleviate the Signs and Relieve the Symptoms of Neurological Disease
4.30	Dr Phil Kearney Director External Licensing, Merck Sharp & Dohme	Close
4.45-5.45	NETWORKING WITH DRINKS & CANAPES
