"When choosing a career, it was important for me to pick something that would give me fulfilment.

Early childhood education has definitely given me that, and there have been many moments where I've been able to have a really positive impact on my students.

UniSA's reputation for practical and industry experience meant that I completed various industry placements, where I applied knowledge into practice.

Since graduating, I have secured a job as a Reception teacher, which is incredibly exciting."

"My teachers helped me to become the holistic and caring Registered Nurse I am today.

After learning new skills using the unique virtual health community and on-campus simulated hospital environment, I completed placements in a rural nursing home, a stroke unit, neurosurgery ward and a cardiac surgical unit.

The highlight was observing an open-heart surgery, which ultimately led me to a career in paediatric surgical nursing."

“UniSA was the obvious choice because it was one of the few universities in Australia – and the only in the state – to offer an aviation degree.

As someone who is fascinated by airplanes, I have thoroughly enjoyed discovering the mysteries of the aviation industry.”

**Joshua Chin**  
*aviation pilot graduate*

“I wanted to study engineering management because I was interested in overseeing large-scale projects at multiple stages.

My studies are preparing me to manage and balance time, costs, resources, quality controls, communications, procurements and risk management – all the things you need for successful project delivery.

Through a workplace project, I was able to get industry experience and work on my presentation skills in professional meetings with real clients.”

***Hazel Zapanta***
