

Research & Innovation Services - Guide for Researchers

The *'Research & Innovation Services (RIS) Guide for Researchers'* is a quick reference information sheet designed to support you, our research community, to navigate through the many services RIS provides. Together with the [RIS Website](#), it forms an all-encompassing gateway to key contacts in RIS and who to contact to help you with your project or enquiry. We encourage researchers to use these pathways whenever possible and get in contact with RIS so that we can help you along your research journey at UniSA.

Who is RIS?

RIS is a team of professional and academic staff located across the university, assisting researchers with identifying potential research partners, securing funding, contract and project establishment, and ongoing management of research projects. RIS also provides support on strategic initiatives, and education & training activities associated with Research Degree Students and supervisors.

RIS Guide for Researchers

RIS Service	Contact details
<p>Office of the Director Research & Innovation Services</p> <p>For any general enquiries relating to research at UniSA.</p>	<p>Director Jodieann.Dawe@unisa.edu.au</p> <p>Executive Assistant and Project Officer Mandy.Clements@unisa.edu.au</p> <p>Administration Officer Cath.White@unisa.edu.au</p>
