## DEFINITIONS:

Subject Area and Catalogue Number

A 4-letter subject area code plus a 4-digit catalogue number make up the course code, e.g. **BIOL 1033**. You can search for courses by using this code.

Class Number

A class number is a unique number used to identify individual classes held during a specified study period. You can use class numbers to enrol, starting with the class number of the enrolment class.

Enrolment Class

An Enrolment Class is the first class you enrol in for a particular course. This can be a lecture (LEC), tutorial (TUT), workshop (WSH), practical (PRA) or external (EXT). There may be multiple enrolment classes to choose between. All other classes will be related to the enrolment class and will display once you select your enrolment class.

Related Classes

Related classes are other components (i.e. a tutorial or practical) that make up the course. In some cases you may be automatically enrolled into a particular related class that is associated with the enrolment class you selected.

Auto Enrol Class

In some courses, once you select the Enrolment Class, you are automatically enrolled (Auto-Enrol) in a second (related) class (e.g. by choosing a tutorial you are automatically enrolled into the lecture). You may still be required to select another related class to complete your enrolment.

## Study Period 2 - Course Information

## FIRST YEAR

Course name	Course code & Catalogue No.	Enrolment Class numbers	Auto Enrolled Classes	Options Students must choose to complete their enrolment
<a href="#">Human Anatomy 100</a>	HLTH 1020	<p>Practical: Choose one of the following class numbers 21316, 21317, 21318, 21319, 21323 or 21328.</p> <p><b><u>Students please note:</u></b></p> <p><b>These classes are specific to your program.</b></p>	Lecture	Your enrolment is now complete.
