## DEFINITIONS:

Subject Area and Catalogue Number Class Number	A 4-letter subject area code plus a 4-digit catalogue number make up the course code, e.g. BIOL 1033. You can search for courses by using this code.
Enrolment Class	A class number is a unique number used to identify individual classes held during a specified study period. You can use class numbers to enrol, starting with the class number of the enrolment class.
Related Classes	An Enrolment Class is the first class you enrol in for a particular course. This can be a lecture (LEC), tutorial (TUT), workshop (WSH), practical (PRA) or external (EXT). There may be multiple enrolment classes to choose between. All other classes will be related to the enrolment class and will display once you select your enrolment class.
Auto Enrol Class	Related classes are other components (i.e. a tutorial or practical) that make up the course. In some cases you may be automatically enrolled into a particular related class that is associated with the enrolment class you selected.
	In some courses, once you select the Enrolment Class, you are automatically enrolled (Auto-Enrol) in a second (related) class (e.g. by choosing a tutorial you are automatically enrolled into the lecture). You may still be required to select another related class to complete your enrolment.

Notes: IMPE is designed to be a full-time program. If you want to study part-time, you need to discuss this with the program director first.

## IMPORTANT:

**You will not be able to enrol in any course for 2025 until you receive an email and link to the placement spreadsheet. This will contain your ID number and your course/placement allocations for the year. You must enrol into your allocated course/class number as it is linked to your placement allocation. Failure to enrol as instructed may mean you do not receive a placement allocation due to the limited places available in each clinical block.**
