DEFINITIONS:

Subject Area and Catalogue Number
Class Number

A 4-letter subject area code plus a 4-digit catalogue number make up the course code, e.g. **BIOL 1033**. You can search for courses by using this code.

Enrolment Class

A class number is a unique number used to identify individual classes held during a specified study period. You can use class numbers to enrol, starting with the class number of the enrolment class.

Related Classes

An Enrolment Class is the first class you enrol in for a particular course. This can be a lecture (LEC), tutorial (TUT), workshop (WSH), practical (PRA) or external (EXT). There may be multiple enrolment classes to choose between. All other classes will be related to the enrolment class and will display once you select your enrolment class.

Related classes are other components (i.e. a tutorial or practical) that make up the course. In some cases, you may be automatically enrolled into a particular related class that is associated with the enrolment class you selected.

Auto Enrol Class

In some courses, once you select the Enrolment Class, you are automatically enrolled (Auto-Enrol) in a second (related) class (e.g. by choosing a tutorial you are automatically enrolled into the lecture). You may still be required to select another related class to complete your enrolment.

External Class

There is only one enrolment class number you need to enter in 'Manage my Enrolment' when enrolling.

First Semester (Study Period 2) February 2025 – *Please enrol into one of the courses listed below*

Subject Area	Catalogue Number	Course Name	Class	Notes
NURS	5172	Introduction to High Acuity Nursing and Midwifery	<p>Acute Midwifery class 22120 Please refer to the timetable</p>	<p>NURS 5172 Introduction to High Acuity Nursing and Midwifery has been developed for Registered Nurses and Midwives who seek to enhance their understanding of the processes required to recognise and respond to clinical deterioration in the patient, neonate, or pregnant women in their care. To meet the specific needs of the Registered Nurse or Midwife who enrolls in this course four, (4) clinical specialty streams (or classes) have been developed. To ensure that you enrol in the correct stream (class), review the following overview.</p> <p>Midwifery Overview</p> <p>Introduction to High Acuity Nursing and Midwifery (Acute Care Midwifery) is designed for the midwife working with woman to develop understanding of co-morbidities and deterioration in a woman’s clinical condition during pregnancy. This course supports midwives working in metropolitan, regional and remote areas.</p> <p>Focusing on the pregnant woman this stream (class) will use a case-based journey to enable you to critically analyse and discuss four woman who deteriorate during their pregnancies. Following each woman for four weeks, you will explore the deterioration, the clinical manifestations, underlying pathophysiology, to formulate a plan that articulates the interventions required to stabilise the women until help arrives.</p> <p>This is the Acute Midwifery class</p>
NURS	5157	Perinatal Mental Health for Health Professionals	<p>22127 Please refer to the timetable</p>	

NURS	5164	Best Practice in Adolescent Mental Health	22002 Please refer to the timetable

Second Semester (Study Period 5) July 2025 – *Please enrol into one of the course listed below*

Subject Area	Catalogue Number	Course Name	Class	Notes
NURS	5150	Leadership and Management in Nursing and Midwifery	52038 Please refer to the timetable	
NURS	5174	Implementing Teaching and Learning in Health Education	51980 Please refer to the timetable	

NURS	5172	Introduction to High Acuity Nursing and Midwifery	<p>Neonate class 52037</p> <p>Please refer to the timetable for the</p>	<p>NURS 5172 Introduction to High Acuity Nursing and Midwifery has been developed for Registered Nurses and Midwives who seek to enhance their understanding of the processes required to recognise and respond to clinical deterioration in the patient, neonate, or pregnant women in their care. To meet the specific needs of the Registered Nurse or Midwife who enrolls in this course four, (4) clinical specialty streams (or classes) have been developed. To ensure that you enrol in the correct stream (class), review the following overview.</p> <p>Neonatal Overview</p> <p>Introduction to High Acuity Nursing and Midwifery (Neonatal) is designed for a registered nurse or midwife working in the neonatal specialty area such as but not limited to neonatal intensive care, special care units and postnatal wards. This stream (class) explores comprehensive assessment and conceptualises neonatal deterioration and response to deterioration. Using a body systems approach, students will critically review the clinical manifestations and underlying pathophysiology of clinical deterioration and propose the interventions and management required to escalate and stabilise.</p> <p>Note: Registered nurses or midwives in regional or remote areas who are expected to manage pre-term babies until retrieval support arrives are encouraged to enrol in this course.</p> <p>This is the Neonate class</p>
NURS	5160	Skills for Recovery Practice in Mental Health	<p>52046</p> <p>Please refer to the timetable</p>	

NOTES:

1. Students who complete the Graduate Certificate in Midwifery will be eligible to receive 18 units of Advanced Standing into the Master of Midwifery.

2. Students enrol in all courses for both study periods (Study Periods 2 & 5) at the beginning of the year
3. ICMI Students should enrol in classes that are not reserved for SA Health students
4. Students can only complete NURS 5172 once. Students can select from the High Acute Midwifery stream or the Neonatal stream.

ORIENTATION:

An information session will be held for new commencing students – further details to be advised via your student email.

EXTERNAL STUDENTS

Students studying off-campus. Administrative services for external students are located at [Campus Central](#).

External mode includes online, distance education, industry placement or directed research. Virtual classrooms are an external mode of delivery. External mode does not normally include a face to face component, however some courses offered in external mode may require a small component of on-campus activity.

It is strongly recommended that you visit the Academic Learning Support webpage to gain valuable information regarding your studies.

<https://i.unisa.edu.au/students/student-support-services/study-support/>

PART TIME STUDENTS

You can study part-time which means undertaking less than the load specified for full time status.

(Full-time load - The standard annual full-time load is 36 units or 1.0 EFTSL (Equivalent Full-Time Student Load). A student undertaking at least 75% of a full-time load for the academic year will be full-time for that year. A student who is undertaking at least 75% of a full-time load, for either the first half or second half of the year, will be full-time for that half year).

If you require further enrolment advice, please refer to the **Academic Unit contact details** listed on the first page or contact [Campus Central](#).
