PART 6: STUDENT DEVELOPMENT ACTIVITIES

Commencing research degree candidates should familiarise themselves with the Enhancement of Doctoral Graduate Employability (UniSAEDGE) framework. UniSAEDGE provides a platform that enables candidates to understand their current knowledge, skills and experience and to record future research education experiences. UniSAEDGE then enables candidates to develop a training plan from among a suite of training options provided by the University including from the local and Divisional level, the university-wide level, and from the Australian Technology Network (ATN). Future research education activities should be documented and discussed as part of the candidature planning and review process. The training plan will be reviewed at regular intervals during meetings between the research student and supervisor and other activities assessed as the need and opportunity arise.
